Welcome to Long Rake Spar

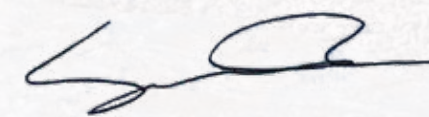

Established in 1867, Long Rake Spar is one of the UK's most established and trusted names in decorative aggregates. As a **family-run business** with over **150 years of expertise**, we have built our reputation on quality, reliability and service. Our heritage is something we're immensely proud of and it continues to shape the standards we set today.

Our **commitment to excellence** remains the cornerstone of our success. We have expanded our operations, strengthened our supply partnerships and continued to **invest** in our people, our products and our processes. Our ongoing commitment to quality is reflected in our BS EN ISO 9001:2015 Quality Management Systems accreditation, which underpins every part of our business.

Sustainability remains at the core of our future. We're proud winners of the **Pro Landscaper Supplier Sustainability and Biodiversity Award** and have taken meaningful steps to reduce our environmental impact, including the installation of a solar array at our Rye Harbour site in East Sussex, now fully powering the facility. Our **long-term vision** is clear: to lead responsibly, ensuring our products are as sustainable as they are exceptional.

At Long Rake Spar, we don't just supply decorative aggregates, we help shape outdoor environments that are built to last. Our Premium Decorative Aggregates collection has grown to meet evolving **design trends**, complementing modern materials like porcelain paving. By combining **heritage with innovation**, we continue to deliver trusted quality, dependable service and an unrivalled range that defines landscapes across the UK.

As we look ahead, our focus remains simple: to deliver trusted quality, exceptional service and an unrivalled choice of products to every customer we work with.

Shane McCormick
National Sales Director

OUR SITES

We operate a network of production and dockside facilities strategically positioned **across the UK**. From our heritage site in Derbyshire to our coastal distribution hubs, this network delivers **extensive production capacity**, secure stock holding exceeding 125,000 tonnes and unmatched speed of **service to customers nationwide**.

Youlgrave, near Bakewell, Derbyshire

The original home of Long Rake Spar since 1867, Youlgrave combines our rich heritage with modern production capabilities. Our company Head Office is located in the heart of Youlgrave village, with our 16-acre production facility nearby.

Annual Production

- 200,000 tonnes.

Storage Capacity

- 62 bays holding over 20,000 tonnes.

Facilities

- Three bulk bag and six pre-pack production lines.
- Two washing plants and a tumbler for superior product quality.
- Drying, screening and bagging plant.
- Tanker loading facilities.

Rye Harbour, East Sussex

The most modern production plant in Europe.

Our largest site at 24 acres, Rye Harbour is our flagship site for renewable energy operations. The facility is entirely powered by newly installed solar panels, demonstrating our commitment to sustainable production.

Annual Production

- 150,000 tonnes.

Storage Capacity

- 55 bays holding over 30,000 tonnes.

Facilities

- Advanced washing facilities.
- Four fully robotic packing lines for high-volume output.
- Fluid bed drying, screening and bagging plants.
- Tanker loading facilities.

Garston Docks, Liverpool

Acquired in 2020, our newest facility operates at the heart of the Northwest. This 15-acre site combines modern production capabilities with substantial dockside storage.

Annual Production

- 150,000 tonnes.

Storage Capacity

- 21 bays holding over 50,000 tonnes.

Facilities

- Modern washing plant with advanced filtration.
- Four fully robotic packing lines.
- Bulk bag production line.
- Direct dockside access for efficient logistics.

Prees, Shropshire

Our dedicated production facility in Shropshire delivers high-volume output from a compact 6-acre footprint.

Annual Production

- 100,000 tonnes.

Storage Capacity

- Stock holding 10,000 tonnes.

Facilities

- Four pre-packed production lines.
- Bulk bag production line.

Moel Tryfan Quarry, Gwynedd, North Wales

Located on the eastern slopes of the Moel Tryfan mountain at approximately 340 metres elevation, this 15-hectare quarry represents our commitment to securing long-term supply of premium Welsh slate products.

Reserve Life

- 25+ years of production secured.

Specialisation

- Plum Slate chippings in 20mm and 40mm grades.
- Slate Path 0-12mm footpath material.
- Rockery stone.

Significant infrastructure investment for high-volume production.

Gunness Wharf, Lincolnshire

Strategically positioned for distribution across northern England, Gunness Wharf provides critical storage capacity for swift delivery to customers.

Storage Capacity

- 10 bays holding over 15,000 tonnes.

Rosyth Docks, Scotland

Our Scottish hub ensures responsive service to customers across Scotland and northern regions.

Storage Capacity

- 6 bays holding over 20,000 tonnes.

Partner with Confidence

When you stock Long Rake Spar products, you're choosing an award-winning sustainable supplier. Our environmental commitments mean you can confidently support your customers' green goals while accessing the quality, consistency and national coverage that our customers expect.

Why This Matters for Your Business

- Meet increasing demand for sustainable materials.
- Support customers' environmental objectives.
- Partner with a certified, award-winning supplier.
- Access growing range of recycled products.
- Demonstrate supply chain responsibility.

Sustainability Across Every Operation

For more than **150 years**, Long Rake Spar has been trusted for quality aggregates. Today, we're building on that heritage with an industry-leading commitment to **environmental responsibility** that's verified through our **PlanetMark** certification.

Third-Party Verified Commitment

Our PlanetMark certification provides independent verification of our carbon reduction efforts and demonstrates our commitment to continuous improvement. This ensures our environmental claims are measured, monitored and meaningful.

PlanetMark certification requires us to:

- Measure our carbon footprint across all operations annually.
- Achieve year-on-year reductions in emissions.
- Undergo independent third-party auditing.
- Demonstrate transparent reporting of our environmental impact.
- Commit to science-based reduction targets.

This certification holds us accountable and provides our customers with confidence that our sustainability commitments are backed by verified data. Every year, we must demonstrate measurable progress to maintain our certification, ensuring continuous improvement is built into our operations.

Renewable Energy Leadership

Our new solar array at Rye Harbour generates 100% of the site's energy needs, powering 150,000 tonnes of annual production with clean electricity. This flagship installation demonstrates that large-scale aggregate production can operate independently from the grid while reducing carbon emissions.

Energy Efficiency at Scale

Low-voltage LED lighting is now standard across all our production sites, significantly reducing energy consumption while improving working conditions for our teams.

Circular Economy Commitment

From all our packaging containing 30% post-consumer waste to our fully recyclable point-of-sale and packaging, environmental thinking extends to every customer touchpoint. Our recycled product range continues to expand, offering landscapers sustainable alternatives without compromising on quality.

Recycled Product Range

NEW FOR 2026: ENVIRO STONE

Transforming a by-product of the China Clay industry into a beautiful decorative aggregate. Premium aesthetics with enhanced environmental credentials.

FLAMINGO PEBBLES

Gorgeous pink, grey and white tones create a unique but subtle style. Recycled aggregate perfect for contemporary landscaping projects seeking sophisticated colour palettes.

RECYCLED SLATE

Reclaimed slate chippings and rockery stone offers an authentic appearance with reduced environmental impact.

FLAMINGO CHIPPINGS

The same distinctive pink, grey and white blend in a chipping format. A sustainable alternative delivering striking visual appeal with reduced environmental impact.

QUALITY

We maintain **BS EN ISO 9001:2015 Quality Management Systems** accreditation, which establishes the framework for our approach to product quality, process management and customer service.

Our supply chain consists of carefully selected partners who adhere to the same quality standards we apply internally. This ensures consistency across all materials we source and supply.

Each product is subject to quality controls throughout the supply process, from initial sourcing through to final delivery.

These procedures are designed to maintain the reliability and specification compliance our customers require.

Our quality management system supports continuous monitoring and improvement of our operations, enabling us to maintain consistent standards across all aspects of our business.

SERVICE

We respond fast, deliver consistently and build relationships that last. We've built our business on **reliability** and **trust**, working closely with builders merchants and landscape centres across the UK who need suppliers they can count on.

Our strategically located dock and production facilities enable us to respond quickly to requirements while reducing environmental impact through optimised logistics and fewer lorry movements on the road network.

We've developed a network of merchant partners who share our standards, ensuring consistent service and product availability nationwide. We provide detailed product information through our brochure and website, and many of our stockists maintain display areas where you can view samples and assess materials first-hand.

We understand that choosing the right aggregate matters. Our experienced team is available to provide genuine guidance on specifications and applications, not just process orders. We take the time to understand your requirements and ensure you select the right aggregates for your needs.

*"There is no substitute for **quality and service.**"*

It's a principle we live by, and one our customers experience in every interaction with us.

Trevor Broadhurst
Managing Director, Long Rake Spar

GABION BASKETS

Transform gabion installations from functional to **exceptional** with our carefully selected range of rockery and boulders. From dramatic slate and granite to warm Cotswold rockery, our diverse collection delivers the **visual impact** and quality that sets projects apart.

Gabion baskets offer exceptional environmental credentials. Unlike solid concrete walls, gabion baskets are naturally permeable, allowing water drainage and reducing runoff issues.

The gaps between stones create valuable micro-habitats for insects, small mammals and beneficial invertebrates, enhancing biodiversity in both urban and rural settings. As living structures, gabions can be planted with alpines and trailing plants, further supporting pollinators and wildlife, while softening the visual impact. This makes gabions an increasingly popular choice for ecologically-minded developments and wildlife-friendly landscaping schemes.

New for 2026 - Gabion Fill

Our new Gabion Fill product offers an economical approach to gabion construction without compromising structural integrity. This 100-200mm sandstone material is a cost-effective core fill, allowing you to maximise budgets by using it behind premium facing stones. This product is also suitable for non-decorative structural retaining walls.

Whether using economical fill or premium facing stones, each stone type is chosen for durability and aesthetic appeal, ensuring gabion structures maintain their visual impact year after year.

Popular Applications

- Retaining walls and terracing.
- Boundary walls and screening.
- Decorative seating areas.
- Water features and pond surrounds.
- Architectural focal points.
- Erosion control with aesthetic appeal.
- Wildlife-friendly garden structures.

From economical core fill to premium decorative stone, our gabion range turns structural necessity into sustainable landscape opportunity.

INTRODUCING...

**NEW
FOR 2026**

At Long Rake Spar, we're constantly **evolving** our product range to meet the changing needs of modern landscaping and construction projects. This season, we're proud to introduce **five exceptional products** that combine outstanding quality, practical performance and environmental responsibility.

From the striking visual appeal of **Enviro Stone**, with its outstanding eco credentials, to the sophisticated beauty of **Lakeland Blue Slate**, we've focused on products that make a real difference to the finished project. Our new cost-effective **Gabion Fill** offers structural reliability without the premium price tag, while our methyl bromide free **Bark Mulch** and premium peat-free **Top Soil** demonstrate our commitment to sustainable, environmentally responsible solutions.

ENVIRO STONE

Create show-stopping driveways and pathways with Enviro Stone. Combining crisp white Dolomite with silver-grey Granite, this aggregate delivers a striking look that catches the light beautifully while maintaining outstanding environmental credentials.

- **Distinctive visual appeal** – a unique blend that creates a bright, contemporary finish suitable for pathways, garden borders and flower beds.
- **Exceptional eco credentials** – the silver-grey granite component is recycled from the China clay industry, giving new life to industrial by-products.
- **Sustainable choice** – reduce environmental impact without compromising on quality or aesthetics.

Whether you're creating stunning decorative features for residential gardens, building robust structural elements for commercial developments, or establishing healthy planting areas that will thrive for years to come, these products offer the reliability, consistency and quality you've come to expect from Long Rake Spar.

Explore our new range and discover how these versatile products can enhance your next project.

LAKELAND BLUE SLATE

Transform outdoor spaces with the sophisticated beauty of Lakeland Blue Slate Chippings. Their deep blue-grey tones create a stunning contemporary aesthetic, darkening when wet to reveal occasional delicate white calcite veining that adds natural character and visual interest.

- **Versatile applications** – ideal for driveways (20mm size), pathways, garden borders, ponds and water features.
- **Fish friendly** – safe for aquatic environments, perfect for ponds and water features.
- **Distinctive character** – subtle colour variations and natural veining ensure every project is unique.

GABION FILL

Maximise your project budgets with our new Gabion Fill. An economical solution for gabion construction that delivers structural integrity without the premium price tag. This 100-200mm sandstone material is the smart choice for cost-conscious projects requiring reliable core fill.

- **Cost-effective construction** – use as core fill behind premium facing stones to optimise material costs.
- **Ideal core material** – perfect density and gradation for stable, well-compacted gabion structures.
- **Versatile applications** – ideal for gabion baskets, landscape features and bulk retaining wall construction.

BARK MULCH

Enhance garden beds, borders and pathways with our high-quality, multi-purpose bark mulch. This product combines aesthetic appeal with practical benefits, creating a neat, well-maintained appearance while protecting and nourishing your plants naturally.

- **Natural weed suppression** – reduces maintenance time while retaining soil moisture for healthier plants.
- **Sustainable and safe** – Free from chemical contamination.
- **Quality specification** – 10-35mm particle size, maximum 15% white wood and high percentage of spruce content.

TOP SOIL

Achieve professional planting and landscaping results with our premium multi-purpose topsoil. This peat-free, sandy loam is specially formulated for superior workability and plant health, making it the ideal choice for quality-focused residential and landscaping projects.

- **Light and friable texture** – easy to work with even in wet conditions, reducing labour time and effort.
- **Peat-free and sustainable** – environmentally responsible choice without compromising on performance.
- **Quality assured** – analysed to BS3882:2015, safe for both commercial landscaping and residential applications.

APPLICATION CONSIDERATIONS

Our brochure and website showcase the full range of decorative aggregates we offer, providing inspiration for all garden styles. Many of our stockists also feature displays, allowing you to see materials and sizes first-hand before making your final choice.

With Long Rake Spar, creating the garden of your dreams has never been easier.

Selecting the right aggregate for its intended use is key to achieving both practicality and aesthetic appeal. Here's our guide to choosing the perfect product for common garden applications:

Driveways

- For durability and stability, we recommend 14-20mm angular chippings. These interlock more effectively than rounded stones, providing a firmer surface that is less prone to movement underfoot or vehicle use.

Pathways

- Angular gravels in the 10-20mm range work well for pathways, offering stability and a comfortable walking surface.
- For sloped paths with a gradient greater than 1:20, consider using stabilising grids to prevent material movement.
- Specialist pathway materials like Goldpath provide a compacted, even finish and are also ideal for well-trodden areas.

Water Features and Ponds

- Many of our aggregates become even more striking when wet, making them a fantastic choice for water features and ponds.
- For ponds with fish, avoid using marble, dolomite, or limestone, as these can alter water pH levels. To protect pond liners, we recommend using smooth, rounded materials like pebbles or cobbles to prevent punctures.

Raised Beds and Borders

- Decorative aggregates are a versatile option for raised beds and borders. Combining chippings, pebbles, cobbles, and boulders can create visual interest and texture.
- To brighten shaded areas, consider using lighter-coloured aggregates to reflect light and lift the space.

By carefully considering the application and choosing the appropriate aggregate, you can ensure your garden is both functional and visually stunning.

Washed and Unwashed

Many of our premium aggregates are meticulously washed to remove fine particles and silt, resulting in a cleaner, more vibrant finish that meets the high expectations of discerning customers. Washed aggregates provide an immediate polished appearance, perfect for projects where aesthetics are a priority.

For those opting for unwashed products, a simple rinse with a hosepipe or watering can after laying can achieve a similar effect. As the water flows through the aggregate, the fine particles naturally settle underneath the surface, leaving a clean and uniform top layer.

Whether you choose washed or unwashed products, both options offer excellent functionality and appearance, depending on your project needs.

Note: Be aware that decorative aggregates are a natural product and variations in size and colour may occur due to geological and processing variables.

QUANTIFYING YOUR REQUIREMENTS

The key to buying the correct quantities is understanding the depth of material required.

This will depend on the chosen application and the material size.

The **Suitable Depths** table (below) is a simple guide to help.

Remember, too little material can leave weed membranes visible, too much can result in pooling/sinking underfoot and displacement of material, especially with rounded aggregates.

Too much aggregate

Too little aggregate

Suitable Depths

Product Type	Size Range	Approx. Depth
Small Chippings	3-8mm	20mm
Gravel, Chippings and Pebbles	8-14mm	30mm
Gravel Chippings and Pebbles	14-20mm	50mm
Slates	20-40mm	50mm
Pebbles	Up to 40mm	75mm

So now you have the required depth, how do you know what to purchase?

The **Weight and Bags** table (below) turns your depth into an approximate material weight, the number of poly bags and the number of bulk bags required to cover an area of 10sq.m. These numbers can be ratioed according to the area of your site.

Weight and Bags

Depth	Material for 10m ²	Poly Bags for 10m ²	Bulk Bags for 10m ²
20mm	340kg	17 Bags	0.43 Bag
30mm	500kg	25 Bags	0.63 Bag
50mm	840kg	42 Bags	1.05 Bag
75mm	1240kg	62 Bags	1.55 Bags

If you're still unsure, please speak to your stockist or use the simple calculator tool at: longrakespar.co.uk.

PREMIUM COLLECTION

The Premium Collection brings together our leading landscaping materials. This is a range of high-quality gravels and chippings, and pebbles and cobbles that add a distinctive finish to any garden.

TESTIMONIAL

At All NU Landscapes, we've always believed that the foundation of any great project starts with using the very best materials. Our **custom-built show garden** was designed to give clients a hands-on experience, a place where they can explore real-life examples of **textures, finishes, and design combinations** before making decisions for their own outdoor spaces.

Since installing the new Long Rake Spar display unit, we've seen a **huge improvement** in how clients engage during consultations. Having access to a wide range of premium decorative aggregates on display allows us to demonstrate the difference that high-quality finishes can make to a project's overall look and feel. It's elevated the client journey, helping them visualise design options more clearly and appreciate the value of choosing **premium materials**.

The Long Rake Spar range has also strengthened our ability to convert design discussions into full project sales. Client's love being able to see and touch the aggregates in person, and it's made conversations about colour, tone, and texture far more meaningful. The display has become a **focal point** within our showroom, not only inspiring design choices but also helping us deliver truly bespoke results that align with the quality standards we're known for.

Partnering with Long Rake Spar has been a fantastic addition to our offering. Their product quality, reliability, and presentation perfectly complement our mission to **Design | Create | Deliver** outdoor spaces that stand the test of time.

Colin Brown, Director, All NU Landscapes Ltd

TESTIMONIAL

RHS Chelsea Flower Show 2025
Gold Award Winner for 'The Garden of the Future'
RHS Wentworth Flower Show 2025
Gold Award Winner for RNIB 'Legacy Garden'
Best in Show & Best Construction (show garden)

"Long Rake Spar are always my first choice for decorative aggregate for two reasons - quality and reliability. The aggregate is clean and consistent in colour."

I have always been able to get what I need, in the quantities I need it. These are essential when trying to create high end gardens on budget and on time."

Rob Woodhouse
Solent Garden Services

Lakeland Blue Slate	36
Plum Slate	37
Plum Slate Paddlestones	37

Blue Slate

Size:	20mm and 40mm
Colour:	Blue/Grey
Material:	Slate
Shape:	Angular

Blue Slate is a beautiful and very popular flat, angular and natural slate. It is nearly grey when dry, however, when wet it is mainly blue with some purples and grey tones.

Ideal for foot traffic pathways, rockeries and borders. This fish friendly product is also perfect for use in water features and ponds. Matching Blue Slate Rockery is available for a seamless look.

TESTIMONIAL

Why we choose Long Rake Spar products for our projects

As The Green Genie Brothers, we've always taken pride in delivering **high-quality**, long-lasting results for our clients - and Long Rake Spar plays a huge part in helping us achieve that. We absolutely love working with Long Rake Spar because their materials are **consistently top-quality**, and the range of aggregates they offer is one of the best we've seen in the industry.

What really stands out to us is the **knowledge and expertise** behind the brand. Their understanding of the different aggregates - and how each one performs in a variety of settings - has helped us make the best choices for our projects time and time again. Whether we're looking for something decorative, durable, or specific to a client's vision, they're always able to offer **solid advice** and reliable guidance.

How their materials help us deliver better results

Using Long Rake Spar products means we can guarantee consistency, reliability, and a **professional finish** on every job. The quality of their materials helps us create cleaner, sharper, and more durable outdoor spaces, which ultimately leads to happier clients and projects we're proud to showcase.

Jake Thorne and Ethan Thorne,
Green Genie Landscapes

TESTIMONIAL

"Through a long-standing contact in the aggregate and reclamation trade in Glossop, I've worked with Long Rake Spar for well over a decade. Even after stepping back from day-to-day landscaping, I continue to rely on them for my RHS Chelsea Flower Show builds and a number of other high-profile RHS show gardens."

Reliability, communication and outstanding customer service are essential in this industry, especially on globally recognised stages like Chelsea. That's exactly why I choose to work with Long Rake Spar. They consistently go the extra mile, make things happen under pressure and deliver the level of support these events demand."

Gareth Wilson MCIHort, FPGCA
GKWilson Garden & Landscape Consultancy Ltd
Independent Expert Witness & Garden Consultant.

Winner of:

- 14 RHS Gold Medals** including RHS Chelsea
- 7 Best In Show** awards
- 5 People's Choice** awards
- 4 Best Construction** awards
- Director Generals **Best Trade Stand** award RHS Chelsea Flower Show

Silver Grey Boulders

Size:	c.250mm
Colour:	Grey
Material:	Granite
Shape:	Rounded

Silver Grey Boulders are rounded granite stones in a soft silver-grey shade with black flecks that darken attractively when wet. Ideal for rockeries, borders and statement features.

Fish-friendly and versatile, they are also perfect for ponds and water features, where their cool grey colouring creates a modern contemporary look.

Tumbled Sandstone

Size:	200-300mm
Colour:	Buff and Grey
Material:	Sandstone
Shape:	Angular

Tumbled Sandstone is a smooth, flat, rounded stone in a natural mix of buff and grey tones, that deepen in colour when wet.

They are perfect for borders, rockeries and feature landscaping. Their warm tones also make them a beautiful addition to ponds and water features, where their fish-friendly qualities ensure safe, decorative use.

Goldpath

Size:	0-10mm
Colour:	Gold
Material:	Sandstone
Shape:	Angular

Goldpath is a golden self-binding gravel supplied at 0-10mm grade. It creates a firm yet natural surface, making it the ideal choice for rural footpaths, cycleways and seating areas.

Once compacted, it forms a stable, textured finish that is cost-effective, durable and easy to maintain. Recommended spread rates are 100kg/m² at 50mm depth or 180kg/m² at 100mm depth.

Slate Path

Size:	0-12mm
Colour:	Plum
Material:	Slate
Shape:	Angular

Slate Path is a finely graded plum slate that provides a practical alternative to traditional paving materials. Its beautiful natural plum colour deepens attractively when wet, while the 0-12mm size ensures a compact, stable surface.

Easy to lay and low-maintenance, Slate Path is an excellent choice for pathways, garden trails and as a decorative mulch.
